TELESCOPIC SLIDES

Our product portfolio of ball-bearing telescopic slides is complemented by the **ultra heavy-duty slide** program. These exceptionally robust slides are milled from solid material, which has a highly positive effect on load capacity and extension length.

Technical key data (summary):

- Load capacity: up to 2,500 kg per pair of slides
- Length: up to 3,000 mm
- Deflection: minimal, ensuring very high bending stiffness
- Applications: heavy-duty sectors such as industrial equipment, machine tools, heavy-duty drawers, special-purpose vehicle construction, and wind turbines

The telescopic slides are available in three material variants:

1. Zinc-plated carbon steel:

These slides are made from high-quality carbon steel and subsequently zinc-plated to ensure enhanced corrosion resistance. They are suitable for a wide range of industrial applications with moderate corrosion protection requirements.

Stainless steel V4A (1.4404):

This variant offers maximum corrosion resistance and is commonly used in particularly demanding environments – such as inland and offshore marine applications or anywhere moisture and aggressive substances are present.

Aluminium (EN-AW 6082 T6):

Aluminium telescopic slides are used wherever weight reduction is a priority – for example in aerospace, caravanning, or transportation. They combine low weight with high stability and good corrosion resistance.

Telescopic slides made from solid material – robust, precise, customizable

Our high-quality solid material telescopic slides offer maximum stability and durability – perfect for demanding industrial and commercial applications. With us, you'll find the right extension variant:

Partial extension (50 % Extension length)

Consisting of 2 profiles – ideal for applications with limited installation space.

Full extension (100 % Extension length)

With 3 profiles – allows full access to the drawer.

Over extension (up to zu 200 % Extension length)

3 to 5 profiles – maximum mobility for special requirements. Also available as a super-extension with double the extension length.

Delivery times:

As these telescopic slides are custom-manufactured upon receipt of your order, they have a delivery time of **15 to 20 working days**.

Custom-made to measure:

You have specific requirements? No problem – we also implement custom-tailored **special solutions** according to your exact needs.

**We look forward to supporting you with your project.
Feel free to contact us.**
